

Dr. Rodler "Rick" Morris

Computer Sciences Corporation

**Program Manager
Army's Battle Command Knowledge Management System**

Dr. Rick (Rodler) Morris is the Computer Sciences Corporation (CSC) Program Manager for the Army's Battle Command Knowledge System and Army Operational Knowledge Management. As a civil servant, he created Army Knowledge Network in 1991-1995, led AKN into the Center for Army Lessons Learned, and served as Deputy Director of the Center for Army Lessons Learned from 1995 until 2002.

During 2002-2005, he developed the foundations for Army knowledge management applied to training, leader development, and military operations as Chief Knowledge Adviser / Integrator in the Office of the Secretary of the Army, Army CIO / G-6. His work in Army KM and in furthering Army adoption of web services and Semantic technology has contributed significantly to the development of knowledge-based, net-enabled land power and has influenced business and the academy. His ideas and teams have had considerable impact on actual operations from 1989 until the present war in Iraq and Afghanistan, and on the design of the future Army.

He is a PhD and MA in modern European history (and former tenured college and university associate professor), a Master Certified Knowledge Manager, a Lean Sensei and a Six Sigma Black Belt.
