Sir:

VICTORY! I have the transcript of our meeting on disk and uploaded into Microsoft Word version 4. The document is 22,000 words short. I will complete comparing the transcript with the tapes and making the necessary edits in a week. I then plan to either mail you a disk or send the document over MILNET. I also have a transcript of the training briefing which you gave to CINC USAREUR on the same disk. Will get that to you the same way I send the oral history transcript.

The process now has all the bugs worked out and receiving information from you will not cause a problem here. The troops know what to do and can make the necessary conversions quickly.

Col Carey very much appreciated receiving a copy of your briefing slides for the VCSA brief on 11 Mar. They continue to work the problem but are having difficulty bringing Leavenworth on board. Don't know the specifics of the problems. I plan to "check the oil" in about a week.

Very Respectfully,

Bob Reddy
