

George Steuber Papers

The George Steuber papers is a partially open, processed collection of paper material collected by Mr. Steuber while he was involved in several U.S. Army operations.

The material is organized in three boxes by country of the operation (Cambodia, Somalia, Haiti) If the folders were labeled by Mr. Steuber, the title of the folder was retained. The folders containing the Haiti material were regrouped into a loose subject arrangement, maintaining the original folder labeling.

Most of the material is declassified, some is restricted because of classification. Other materials cannot be reproduced because of privacy act considerations. Consult the archivist for more detailed information.

COLLECTION DESCRIPTION

The smallest collection is of material on Cambodia, gathered during a tour as United Nations Military Liaison Officer with the United Nations Advanced Mission in Cambodia in 1992. Then MAJ Steuber was also the Force Commander's Personal Representative in Kampong Thom Province with the United Nations Transitional Authority in Cambodia. (UNTAC) The material was collected to help prepare U.S. military personnel for future assignments to UNTAC.

The second collection relates to U.S. Army operations in Somalia from October 1993 to January 1994. The material was acquired after the redeployment of Joint Task Force Somalia Headquarters elements from the 10th Mountain Division (light).

The largest collection is of material from Operations Uphold Democracy and Maintain Democracy, U.S. Army operations in Haiti in 1994-1995. A large portion of this material deals with the operation of multinational forces in Haiti.

The material on Haiti and Somalia were collected to document the participation of the 10th Mountain Division Artillery personnel and units in operations other than war. The material was donated to the Combat Studies Institute at Fort Leavenworth in 1998. The Combat Studies Institute subsequently transferred the materials to the Combined Arms Research Library for processing and storage.
