

Harry A. Sotomayor is the Chief Engineer for the Project Manager Constructive Simulation (PM ConSim) Office at the U.S. Army PEO STRI responsible for the development and System of Systems integration of constructive simulation into the Integrated Training Environment (ITE). He has 30 years of acquisition experience working on Live, Virtual and Constructive training and simulation programs. His current interests include service oriented architecture (SOA) and LVC interoperability in support of Army training. Prior to his current assignment, he was the Chief Engineer for the Warrior Trainer Integration (WTI) Office at the U.S. Army PEO STRI responsible for the Live Virtual Constructive Integrating Architecture (LVC-IA), the Deputy Director for Integration and Test for the Joint Simulation System (JSIMS) and Lead Systems Engineer for Close Combat Tactical Trainer (CCTT) responsible for research and development. He earned a Bachelor of Science in Electrical Engineering from the University of Puerto Rico in 1986, and a Master of Science in Operations Research (Stochastic Simulation) from The George Washington University in 1993.
