## U.S. Army Combined Arms Center and Fort Leavenworth

"We cannot expect to capture the imagination of combat-seasoned forces that have been in some of the most complex environments imaginable for almost a decade by sitting them in a classroom and bludgeoning them with PowerPoint slides. We must make the 'scrimmage' as hard as the 'game' in both the institutional schoolhouse and at home station."

-- General Martin E. Dempsey

OUR PROFESSION – LIVING THE ARMY ETHIC

# Agile and Adaptive Leaders

**Problem Statement:** *The Nation faces a more complex and ambiguous threat environment than ever before. For the first time in history, we must design the Army to face an enemy that can rapidly adapt to exploit our weaknesses and avoid our strengths.*

## Changes in the Environment

**Threat organization:** Many potential adversaries are native to an ambiguous environment and remain indistinguishable from protected populations.

**Technology:** Adversaries can rapidly translate commercial innovation into military advantage.

**Information:** Information diffuses rapidly to a global audience leading to unexpected, emergent behaviors in societies.

**Societal Expectations:** Society increasingly demands Soldiers and leaders to be expert at choosing if to use violence, not just how.

**“In the struggle for survival, the fittest win out at the expense of their rivals because they adapt themselves best to their environment.”**

**-- Charles Darwin**

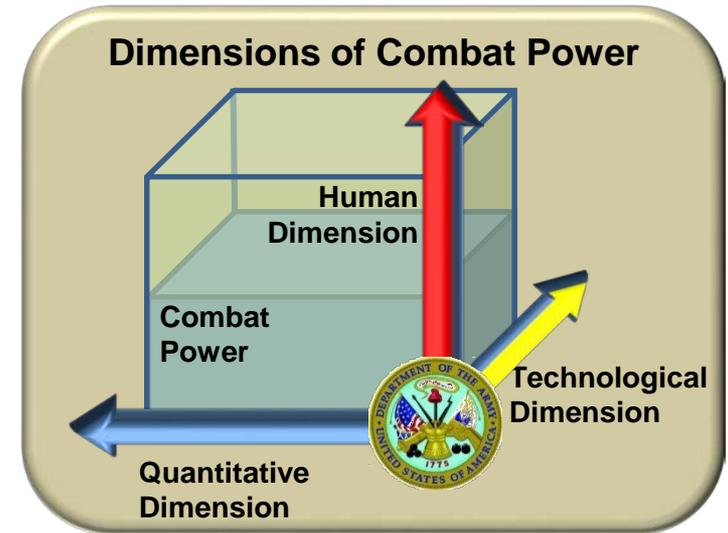

## Realities of the Future Operating Environment:

1. Future adversaries can and will **be able to rapidly adapt** to avoid our strengths and exploit weakness.
2. Equipment and technology alone **cannot keep up** with the rapid changes in the contemporary environment, but **our people can.**

## Rationale:

Where previous Army Transformations have focused on establishing a quantitative or technological edge over adversaries, the future demands the addition of a **decisive cognitive edge** and a focus on the **'human dimension of combat power.'**

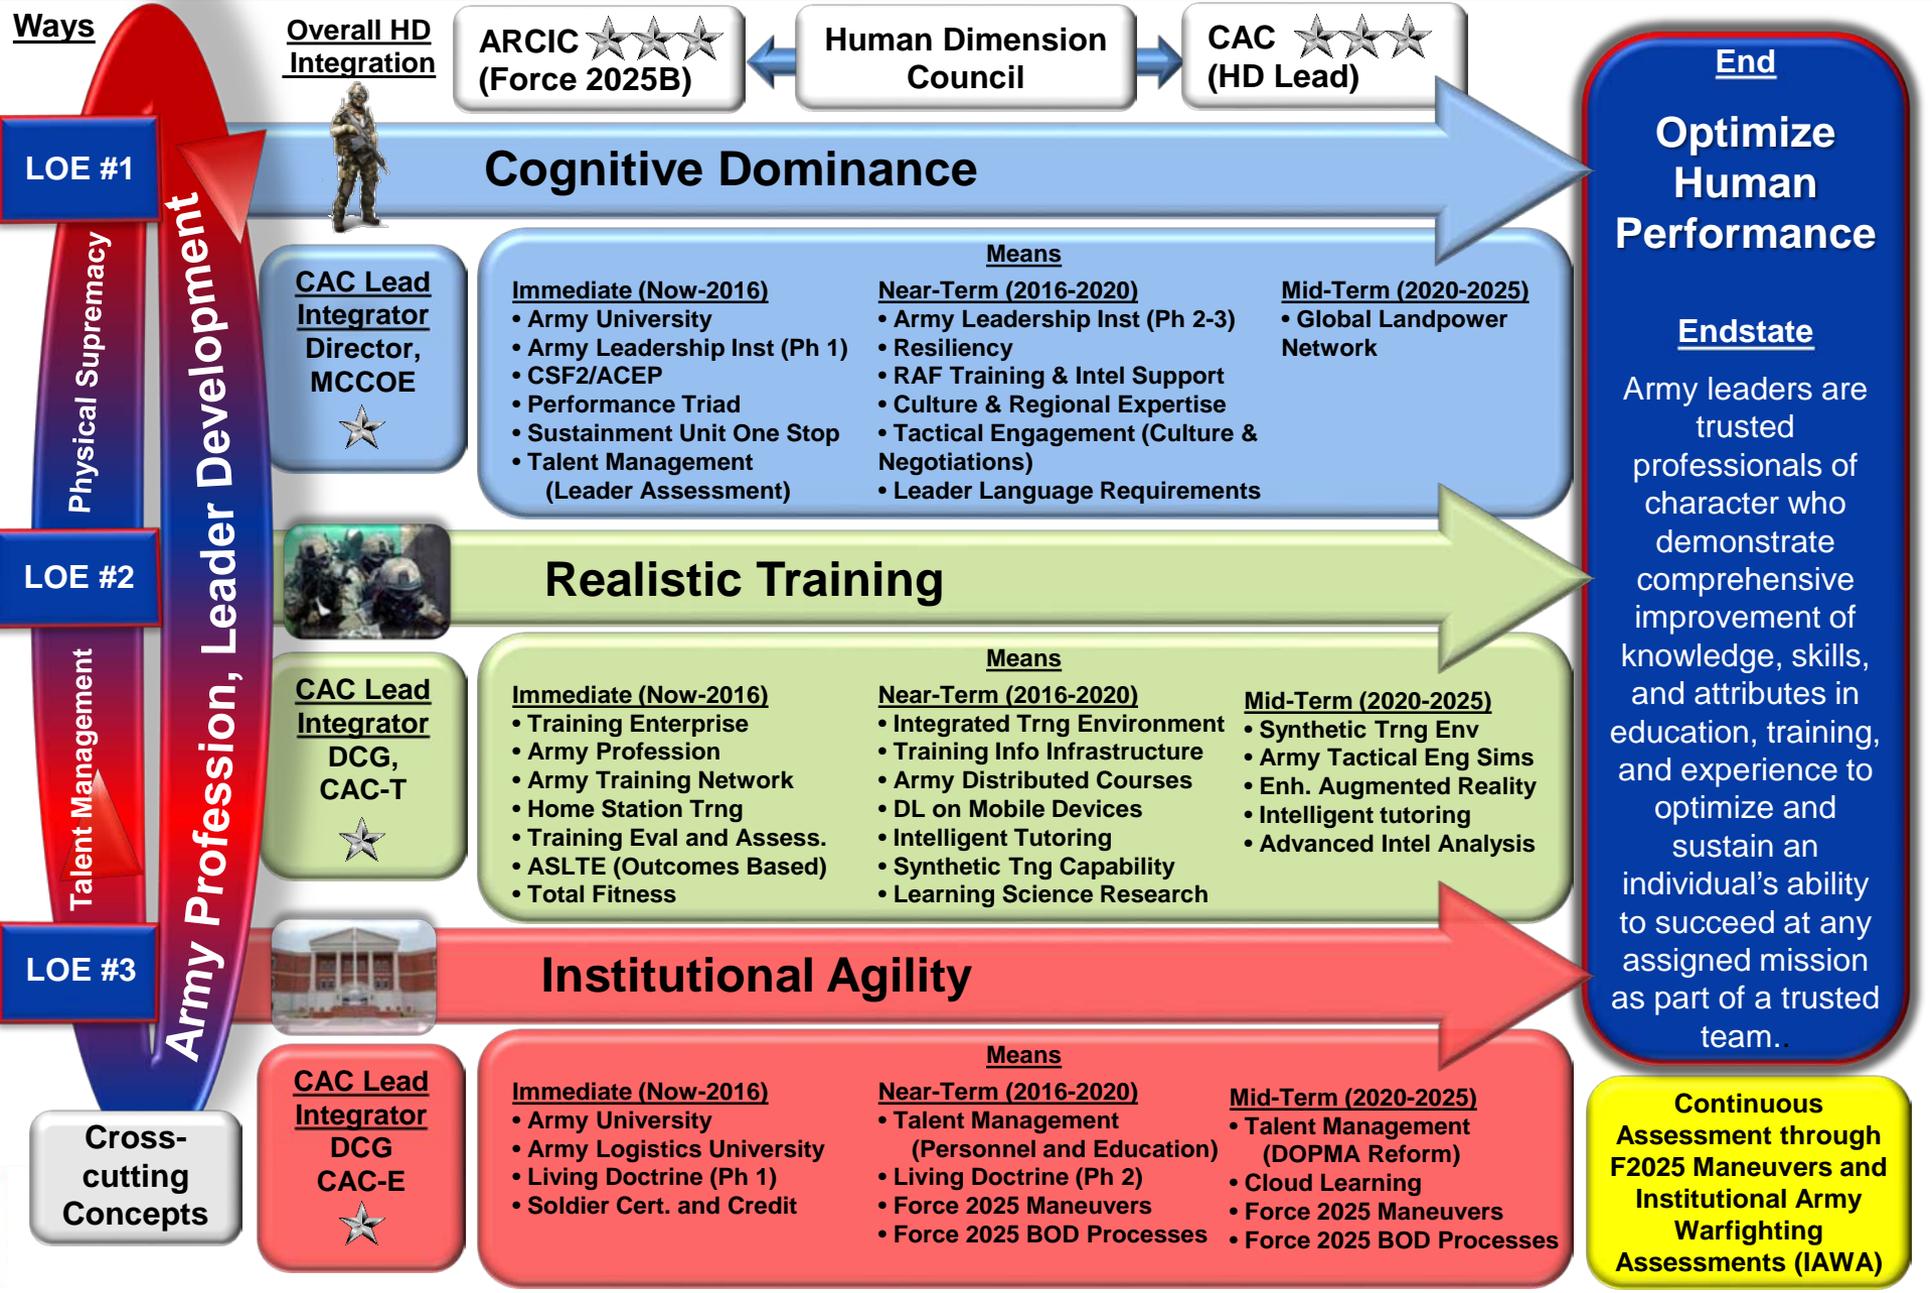

**Quantitative Edge:** Concept to defeat Nazis in 1940s (Rainbow Plans)

**Technological Edge:** Concept to defeat Soviets in 1970s (Big 5 & AirLand Battle)

**Human Edge:** Concept to face an uncertain future

In addition to continued investment in modernization and force structure, the Army must build **cohesive teams of Army Professionals that thrive in conditions of ambiguity and chaos.**

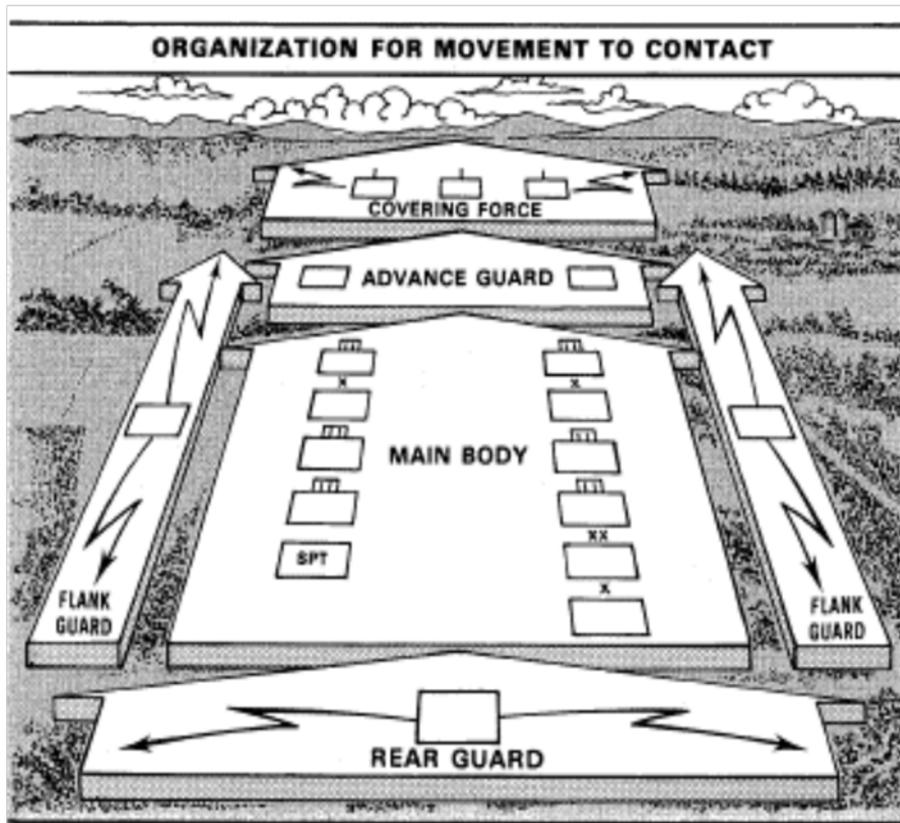

## AirLand Battle:

***Fight outnumbered, and win***

## Unified Land Operations:

***Win in a complex world***
