

ENHANCED TRAINING

Latest developments in Army training

ATN on mobile tablets, smart phones

Now Soldiers can use smart phones and computer tablets to access ATN, the Army's primary web site for training information. To learn more see this [Army News Service article](#) or call 913-684-7249.

Share your best training practices

CAC-T wants to hear about your best training practices from planning a challenging exercise to conducting a thorough AAR. We'll post them on the Army Training Network. Send your training practices and products to: usarmy.leavenworth.cac.mbx.leav-atn@mail.mil

Global Simulation Capability improves readiness

The Global Simulation Capability provides a simulation training enabler for division and corps staffs. GSC helps commanders meet their training requirements. Click [here to learn more about GSC](#) or call 913-684-8334/8165. Also visit its [web site](#).

We want your Army training ideas

Call us at 913-684-8012/8016. E-mail us at: usarmy.leavenworth.cac.mbx.cac-t-pao@mail.mil

TADSS at the right time

The Training Support Analysis & Integration Directorate can ensure units receive Training Aids, Devices, Simulators and Simulations (TADSS).

[Click here to learn more about the TADSS redistribution process](#) or call 757-878-0306. Also visit its [web site](#).

ALMS gets update

The Army Learning Management System (ALMS) delivers web-based, online Army learning content to Soldiers and Army civilians at the point of need.

By decreasing the necessity for brick and mortar classrooms, ALMS gives commanders more flexibility to schedule training.

ALMS allows Soldiers to remain at home station with their families while completing online training and education requirements.

Recent improvements make ALMS easier to navigate and launch courseware.

[Click here](#) to see a one-minute video about improvements to ALMS. For more details, visit the [ALMS web site](#), or call 757-878-0963
