## Compendium of Recently Published Army Doctrine

The doctrine community needs the most current information on recent publications. This discussion provides a short synopsis of new field manuals (FMs), Army techniques publications (ATPs), and multi-Service publications.

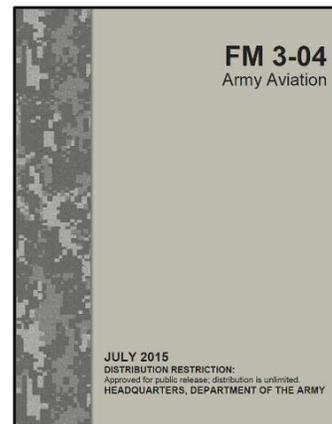

### Field Manuals

APD published the following field manual during the fourth quarter of FY15: FM 3-04. A brief synopsis of the publication and a link to its location are provided below.

FM 3-04, *Army Aviation*, is the Army’s doctrinal publication for conducting aviation operations. It provides the context for employing and integrating Army aviation into unified land operations. FM 3-04 provides a foundation for individual and collective training, subordinate training doctrine, professional military education, and leader development.

FM 3-04 updates previous doctrine and integrates aviation operations into unified land operations. The most significant change is the introduction to air-ground operations, which replaces air-ground integration and better describes Army aviation operations in unified land operations. This publication focuses on employing Army aviation through air-ground operations in support of ground maneuver units conducting decisive action across the range of military operations and the conflict continuum.

It incorporates changes to Army doctrine for DSCA made by ADP 3-28 (2012) and ADRP 3-28 (2013). The most significant changes are that ATP 2-91.7—

- Emphasizes intelligence capabilities and how they enable Army support to DSCA.
- Replaces “civil support” with “DSCA” to reflect this change in fundamental Army doctrine.
- Discusses DSCA in terms of the four core DSCA tasks established in ADRP 3-0.
