

Purpose

Improve individual knowledge and task performance of Army and joint personnel responsible for integrating airspace use and users over an assigned area of operations. This course provides individuals fundamental training and supporting tactics, techniques and procedures necessary to contribute effectively to airspace control and airspace management functions at echelons above brigade.

Key Tasks

- Identify Army division, corps, ASCC personnel, E4 to O5, and USAF liaisons with responsibilities for providing airspace control, conducting airspace management, and planning and integrating airspace users over an assigned area
- Priority seats given to those units preparing for divisions/corps Warfighter Exercise or deployment
- Maximum seating is 36 per course

End State

Course graduates learn to understand Army and Joint airspace planning considerations enabling ground, aerial, joint fires and collection in support of division maneuver; identify responsibilities and authorities associated with airspace control; correlate airspace planning and execution with other joint and mission command processes; develop airspace guidance and priorities; develop and employ appropriate control measures for division operations, employ systems to conduct airspace control and airspace management activities; and integrate other mission command systems and joint systems (TBMCS) with TAIS.
